## LMA-8

## Single-Mode $8 \mu \mathrm{~m}$ Core Fiber

- Low fiber loss from 400 nm to 1700 nm
- Single-mode at all wavelengths
- Radiation hard pure silica fiber
- Wavelength independent MFD

This single-mode photonic crystal fiber is optimized to exhibit low loss across the widest possible wavelength region from 400 nm to above 1700 nm while keeping an almost constant mode field diameter.

The fiber is endlessly single-mode with no higher order mode cut-off and delivers pristine mode quality at all wavelengths.

The fiber has a standard $125 \mu \mathrm{~m}$ outer diameter and is compatible with all common fiber tools.
